

P&S

Self-Contained Devices

FOR EXCEPTIONAL INSTALLATION EASE IN
ANY MANUFACTURED STRUCTURE OR RV.

Pass & Seymour

■ THE ONE THAT WORKS FOR YOU®

 **legrand**®

THE QUALITY APPEARANCE AND FUNCTION YOUR CUSTOMERS DEMAND.

With productivity your business requires.

Imagine installing Self-Contained Devices (SCDs) four times faster than standard wiring devices. Providing your customers with ensured dependability and a quality feel. And having the same finished look as it would with standard devices — absolutely no appearance compromises. You'll have it all with P&S SCDs. Plus additional advantages no other SCD line offers.

SC080-S4

Faster, easier, more flexible installation.

Since our unique installation tool doesn't use the backplate of the device to push conductors into the contacts, there's no need to remove the backplate for inspection or add additional conductors. That's one less installation step, with time saved on every device. Your employees will find it easier to snap on the universal

backs, too, because there's no top or bottom orientation to worry about. P&S SCDs provide connections that stand up to transport and road vibrations better than standard devices, eliminating expensive callbacks.

With fewer sharp edges, there's less chance of a device damaging wallboards and cabinets. And because the P&S installation tool is more compact than the competition's, device installation inside cabinets for microwaves or disposals is much easier.

Moreover, unlike other SCDs, P&S SCDs have top-swinging brackets (rather than side-swinging). That means P&S SCDs can be installed directly alongside studs. You can easily gang them together using one multi-gang wall plate — for the same single-location convenience as standard wiring devices.

The looks you're looking for.

Choose receptacles in traditional or Decorator style. And switches in both single-pole or three-way types. Select from brown, ivory, white, P&S light almond, gray or black to match any décor. Use traditional, screw-on P&S Wall Plates in matching colors.

Or use P&S SCD Snap-On Wall Plates for a sleek, contemporary screwless look. The same SCD Wall Plate fits both receptacles and switches (Decorator-style only), so there are fewer parts to order and stock.
