

Plug Grip™

Never hold an electrical outlet with your fingers again!

- Helps you “out muscle” stiff wires
- Handy for levelling plugs
- Keeps greasy hands away from walls
- Dual power warning lights

Part # 99455

Ever worked on a “hot plug” before? Apparently just about everyone has, but it’s not recommended. Just in case, use the PlugGrip (it’s not grounded), to hold that plug and wrestle those wires. It also has indicator lights to warn you. The PlugGrip keeps your greasy mitts off the wall and it’s handy for levelling plugs.

AUDIBLE CIRCUIT IDENTIFIER

Features

- 3 to 130 volt AC & DC
- Built in polarity lights
- Handy adapter fittings
- Adjustable volume control

SOUND - It's Simple & Reliable

Includes
FREE
adapter Set

LIVE PARTS
"To be on the safe side, I better check to make sure the power is turned off before proceeding..."

Part # 99101

Prevent Electrical Shock! ⚡

- Non-contact detection of 50-1000 VAC.
- Troubleshoot Electrical Circuits.
- A simple way to locate dangerous defective grounds.
- Hand held device for determining presence or absence of 50-1000 Volts AC in insulated wires, wall receptacles, fuses, junction boxes and voltage carrying electrical systems.
- Senses voltage without metallic contact.
- Outstanding safety instruments that locate defective grounds, energized circuits, induced voltage.
- 2 replaceable “AAA” alkaline batteries included
