| Features               | Eaton's residential CH circuit breakers provide premium overload protection. The Type CH circuit breakers trip to the OFF position, eliminating nuisance callbacks. The CHF family also includes a trip flag to differentiate between a trip and the breaker being turned off. The thermal-magnetic trip curve avoids nuisance tripping on mild overloads while reacting almost instantaneously to severe short-circuit conditions. Multiple breakers have an internal common trip connection to operate all poles simultaneous |
| Long Description       | CH 2-Pole GFCI Breaker, 60A, Pigtail, 10KAIC, Class-A GFCI, 5 mA personnel Protection, #14-3 AWG                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Product Type           | CH 2-Pole GfcI Breaker, 60A, Pigtail                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
