

Intersystem Bonding Termination Bar

The nVent ERICO Intersystem Bonding Termination Bar is designed to meet rigorous industry standards with options for both zinc and bronze alloy. The Intersystem Bonding Termination Bar is mounted adjacent to the meter base or service entrance equipment, making it convenient to connect and terminate grounding conductors from telephone, CATV, radio, and television antennas. This bar is impact-resistant and UV-stabilized, ensuring durability.

FEATURES

- Interconnects and terminates grounding conductors from telephone, CATV, radio and TV antennas
- Ideal for residential and small commercial applications
- Integral mounting base enables easy installation
- Connects to grounding electrode conductor – does not rely on meter base enclosure bonding connection

Conductor Material: Copper, Aluminum

Catalog Number	Material	Cover Included	Main/Run Conductor Range	Tap Conductor Range	Number of Connections	Depth D	Length L	Width W	Unit Weight	Rigid Conduit Size
