| Features               | Tested to the highest standards to provide dependable, state-of-the-art protection suitable for residential, commercial, and industrial settings, Eaton's Ground Fault Circuit Interrupter (GFCI) receptacles are designed to recognize a ground fault in your wiring and immediately break the flow of electricity, thus protecting you from electrical shock. Additionally, they prevent resetting if, once tripped, the ground fault renders the device no longer functional. When combined with Eaton's Arc Fault Circuit Interrupter (AFCI) receptacles, the two work together to provide the highest level of protection against both ground faults and arc faults. |
