

SP3456RS

Canless New Construction Smash Plate

HALO

3 sizes.

2 shapes.

1 plate.

The HALO Smash Plate reserves space in new construction installations of 3", 4", or 6" HALO Canless LED Lighting and provides drywall cutout guidance.

Used to meet local code requirements and attach the canless remote driver/junction box during the rough-in phase.

The durable galvanized steel plate is designed with multiple alignment features to enable consistent placement and full coverage between 12- and 24-inch joists.

HALO Smash Plates are another great addition to our full compliment of canless mounting options for you to choose from.

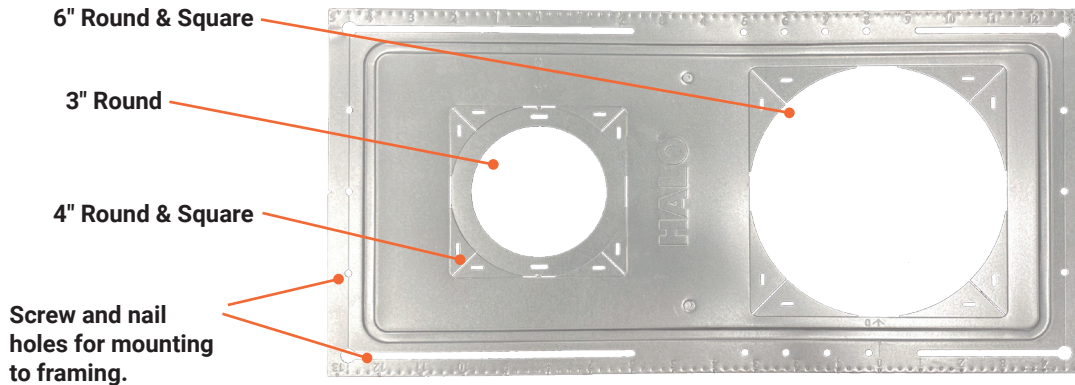

Product Features

- For 3", 4", and 6" HALO Canless LED Adjustables and Downlights
- Corner knockouts convert 4" and 6" openings from round to square
- Easily reserve fixture placement in new construction
- Meet local code requirements by mounting to the building structure
- Provides toolless attachment of canless fixture's remote driver/junction box during rough-in wiring
- Mounting holes and slots enable full coverage between 12- and 24-inch joists
- For precise positioning, imprinted measurement scale and V notches facilitate the use of laser lines or guide strings
- Rolled edges improve the structure and safety of the galvanized steel plate

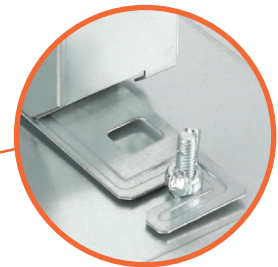

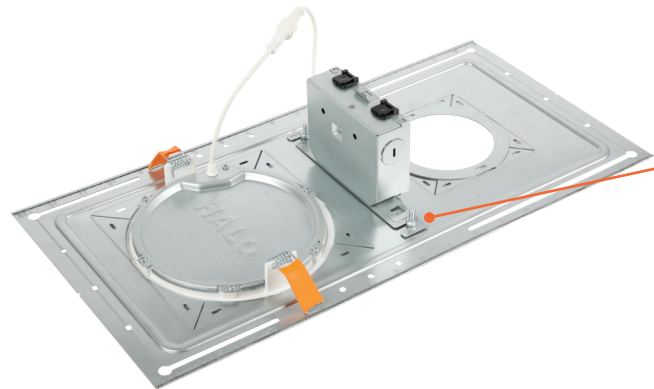

LEARN MORE

Breakaway tabs allow HALO Smashplates to be used with both round or square canless LED downlights.

EASY
INSTALLATION
