

Expand your Easy Kit:

You can easily add additional wired or wireless smart with Netatmo switches, dimmers, and outlets to your pre-paired Easy Kit without the need for the gateway.

NOTES:

- Add any combination of up wired/wireless devices up to 20.
- Devices must be 30ft. or less from nearest wired device.

	<p>Step 1: Prepare New Devices</p> <p>Wired devices: Wire and power all hardwired devices you wish to add to your pre-paired Easy Kit per installation instructions in box. LEDs on wired devices you wish to add will be solid red when powered.</p> <p>Wireless devices: Install on flat surface or over wall box per installation instructions in box. <u>DO NOT remove battery tabs yet.</u></p>		<p>Step 4: Adding Hardwired Devices. (if no hardwired devices, skip to step 5)</p> <p>Press & release the EZ setup button on device you are going to add. LED on device will briefly flash green, then turn solid orange.</p> <p><i>Note: All wired switches, dimmers, outlets, and plug-ins added <u>will ONLY control the individual load wired to or plugged into it.</u></i></p>
	<p>Step 2: Open Network</p> <p>Press & release the EZ setup button on the <u>wired device that came with your pre-paired Easy Kit.</u> LED will turn solid orange.</p> <p><i>Note: You will need to remove the wall plate & subplate to access the EZ setup button.</i></p>		<p>Step 5: Close Network</p> <p>Press & release twice the ON and OFF paddles on the wireless switch simultaneously, pressing and releasing 2 times consecutively. LEDs on all devices will go off.</p>
	<p>Step 3: Adding Wireless Devices (skip to step 4 to add <u>hardwired</u> devices)</p> <p>Pull battery tab from wireless device you are going to add. Press & release the wireless device's ON or OFF paddle once to pair it. LED on device will briefly flash green, then turn orange, then go off.</p> <p><i>Note: <u>All wireless switches or dimmers added will act as group controllers, controlling ALL lights connected to any of the wired smart switch/dimmer/outlet.</u></i></p>		<p>Step 6: Test Your Device</p> <p>For wireless switches, push on paddle to ensure load(s) is turning on.</p> <p>For outlets/plug-ins, plug lamp into outlet marked controlled. Using wireless switch connected to outlet, press on paddle to control lamp on/off.</p>
